trustkey

trustkey Process Execution Platform

In today's world, all stakeholders—whether customers, suppliers, or employees—expect swift service and a seamless experience across all channels and on the device of their choice. With the trustkey Process Execution Platform, your teams can work more efficiently and productively, providing a faster, smarter, and better experience to all involved, regardless of location and time.

trustkey stands out for its user-friendliness and can be flexibly adapted to your individual processes and requirements. All participants have access to a shared platform, where you can determine the scope of access.
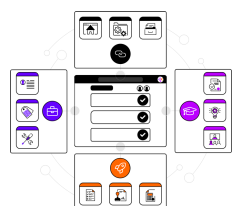

Additionally, trustkey offers the capability to grow alongside your business. Your subscription can be easily expanded to include more employees, and you can add additional packages and features as needed.

We guarantee seamless integration, ensuring that your business processes are not interrupted. We handle all background processes and are always available to assist with any questions you may have
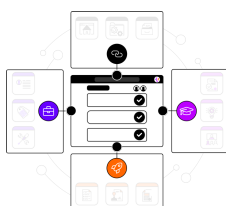

The Revolution of Process Execution for SMEs

Based on a single, lean, scalable, and flexible cloud architecture, customers quickly benefit from using trustkey at every stage of development.
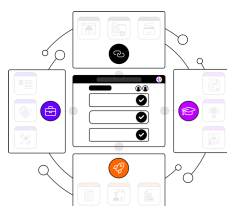

The trustkey platform enables companies to realize a customized and flexible execution system to manage their actions, knowledge, and resources in a coordinated manner. Without the complexity of ERP systems, the platform eliminates information chaos, documentation, and collaboration hurdles, creating the right experiences to enhance the quality, productivity, and adaptability of process execution.

Structuring of Data and Processes

Connecting of Data and Processes

Automating Tasks

One Platform for Your Processes and Data
